www.atlas-apex.com

NOT YOUR AVERAGE ROOFING COMPANY.

Walk into our offices and the first thing that comes to mind is that we don't look like a roofing company. Talk to any of our staff and you won't feel like you're talking to a roofing company. **That's because we are not like any other roofing company in the world.**

OVER 85 YEARS OF ROOFTOP PERFORMANCE.

With over 85 years of experience in the roofing business, we've created a smarter roofing company designed around the way our customers run their businesses. We provide all the tools and information they need, when and how they need them.

ERS EMERGENCY RESPONSE SYSTEM.

24/7/365. IT'S ALWAYS THERE FOR YOU.

Our business is built around providing you the information you need to bring your business back to where it should be.

ATLAS-APEX
ROOFING

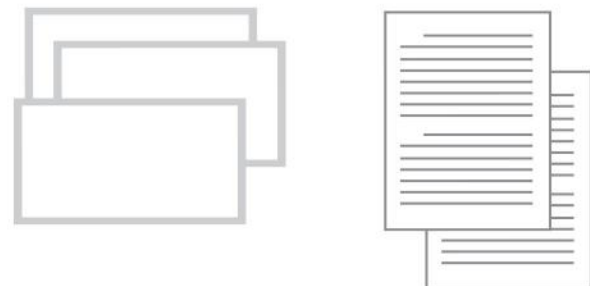

Emergency
Response
SYSTEM

24^{Within}
HRS

That's why we created what we call our Emergency Response System (ERS). It's an automated system plus a team of people who manage the process and communicate what you need to know...when you need to know it.

Within 24 hours of completing your emergency repair, we send you photos of exactly what was repaired. We also send you an estimate detailing what it will take to complete a permanent repair for your emergency problem.

RCS RE-ROOFING COMMUNICATIONS SYSTEM

The RCS is another first in the industry. It offers our customers a complete and private web environment where they can see a comprehensive overview of their roofing project. Everything they need to know is accessible with a simple click.

The RCS delivers a graphic depiction of the project's completion, weather days, roof plans, the project team plus all required documentation as it is created. It also connects our customers to any live video assets associated with their project.

Real-time project communication means our customers can tap into the details in one convenient location. And ultimately, it gives them access to the information they need, exactly when they need it.

BETTER COMMUNICATION IS OUR GOAL.

Why would a roofing company invest so much of its resources in technology? The answer is simple. Communication. It's how we get things done. Technology just helps us get there faster and more accurately. It has always been our mandate to create the tools our customers need to understand what's going on with their roofing systems.

That's why Atlas-Apex uses several unique technological systems to provide our customers with the information their stakeholders need.

CONTACT US

Thank you for your interest in Atlas-Apex Roofing Inc. If you have any further questions regarding our products or services, or how Atlas-Apex Roofing Inc. can address all your roofing needs, please contact us.
